May 3, 2013

**NOTICE OF WATER SERVICE INTERUPTION FOR UTILITY  
MAINTENANCE**

On Monday, May 6, 2013, The Village of Indian Head Park Water Department will be performing some water main maintenance at the intersection of Pontiac Drive and Cochise Drive in preparation for the new water project along Cochise Drive.

Our Contractor Uno Construction Company, Inc. of Downers Grove, Illinois will be installing a new water main valve for our new pipeline to be installed along Cochise Drive. The construction work will be conducted within the Village's right-of-way and within the intersection of Pontiac Drive and Cochise Drive. Road closures are inevitable and residents are encouraged to choose alternate routes while this work is being performed. Once the work is completed, traffic will be restored for pedestrians and motorists.

The Village will be shutting down the water service around 10:00 a.m. and will restore the service after the valve is installed and properly secured. We anticipate the water being shut-off for 3 to 6 hours. Therefore, please store some water for your domestic uses while this work is taking place.

After the water service is restored, you may notice some air in your plumbing system along with your water being slightly discolored. Simply open up your faucets to allow the entrapped air to escape for a few minutes and until the water flows clearly once again.

We apologize for any inconvenience and appreciate your patience while doing this work.

If you have any questions, please feel free to contact the water department @ 708-246-1233, ext# 1 for further assistance.

Thank You,

Edward R. Santen, Jr.

Director of Public Works and Water
